City of Bayfield's 2014 Water Utility Project Begins May 19, 2014

The City of Bayfield has awarded a construction contract to C&W Trucking Inc. Work includes the replacement of 1500 linear feet of water main, asphalt trench patchwork, curb and gutter, sidewalks, restoration, and traffic and erosion control.

Project Areas and Specific Work Activities

**Front Street between Rittenhouse and Washington Avenue**
Replace 400 LF of existing 4" water main with new 8" water main. Replace and relocate existing 12" sanitary sewer. Provide new storm sewer to improve drainage.

**TRAFFIC NOTICE:** Rittenhouse Avenue between First and Front Street will be opened to allow two-way traffic. There will be "No Parking" on the north side of Rittenhouse Avenue and on Front Street between Rittenhouse and Washington Avenue while work is in progress. It is also expected that the parking area south of the Pavilion will be paved at the same time Front Street is paved.

**First Street between Wilson and Rittenhouse Avenue**
Replace 900 LF of 3" and 6" water main with new 8" water main. Provide a new storm sewer to improve drainage.

**Sixth Street between Rittenhouse and Washington Avenue**
Replace 275 LF of existing 3" water main with new 8" water main. Work to be on the upper two-thirds of the block (North of the Bayfield Co. Apartments).

**Sidewalks, Curb & Gutter**
Sidewalks, curb and gutter will only be replaced in the areas where there are service lines. **NOTICE:** if your sidewalk is cracked or spaulding and you would like to replace them, now would be a good opportunity to do so! Please call Tom Kovachevich at 715-779-5731 to discuss.

**Project Timeline**
The project is expected to begin on May 19, 2014 and be substantially completed by June 30, 2014. This schedule is heavily dependent on the weather!
